

## WHAT'S NEW IN RADAROPUS 1.42

RadarOpus **1.42** is an intermediate version, only delivered on DVD and as an ISO-image to new customers of the Endeavour project (Australia). Customers running RadarOpus 1.41 or Radarony 1.41 will be updated to version 1.43 in one step and at that time get access to all new implementations, improvements and books contained in version 1.42 as well as in version 1.43.

This version 1.42 comes with a new look: a new splash screen while RadarOpus is opening and then new icons in the program itself. The Help on line in different languages has been updated with screenshots displaying the new layout.

A new engine, RadarOpus Mini, has been developed to power several upcoming low cost projects. The "Herscu Module Repertory Package" (USA) and the "Endeavour Package" (Australia) are the first.

The newly conceived "Core Synthesis 2016" contains information on 149 key remedies, presenting an ideal entry point for the students or for low cost projects.

RadarOpus 1.42 comes with several new books, among others:

- A package of 9 new Portuguese books
- 2 new volumes complete the set of 7 books by Degroote F. (Belgium)

As usual, several free books have been added as well, mainly provings (except for Radarony and for RadarOpus Mini users).

Backup and restore have been optimized and run up to 30 times faster.

In the patient file (WinChip), several functions have been optimized, such as the management of mail and the billing functions.

## REPERTORY AND MATERIA MEDICA: NEW IMPLEMENTATIONS

- New - RadarOpus 1.42 comes with a new graphical interface. A new set of icons will appear by default after installing the update. These icons are more modern, shaded blue and gray so that the content of the screens stands out more clearly. If desired, support can assist the user to revert to the old graphical interface, after installing version 1.42. Later on, a function will be added so the user can easily do this him/herself.
- New - The list of icons has been cleaned up and trimmed to the relevant minimum of 220 icons (before: 418 icons)
- New - Updated Help on line for Dutch, English, French, German, Italian and Spanish: screenshots and icons of older RadarOpus versions have been replaced to match the new look of version 1.42. For this work, more than 2.200 HTML -pages have been reviewed and adapted.

- New - If there is no help online for a given language, the user is forwarded to the English help online
- New - The RadarOpus hot keys (quick keyboard commands) have been summarized in one table, readily accessible from the menu "Help - Useful shortcuts"
- New - A new splash screen appears when the program opens. It highlights RadarOpus' unique integration of Repertory, Materia Medica and Patient files and shows some authors collaborating with us (two series during a few seconds each).
- New - RadarOpus Mini. To meet the requirements of several upcoming projects, a new engine has been developed in addition to the RadarOpus Light, Easy and Pro engines. As the name indicates, RadarOpus Mini only contains a minimal set of features and functions allowing the basic use of Repertory, Materia Medica and Patient file management. This engine will be used to construct low cost projects. RadarOpus Mini does not have certain features of the upscale versions:
  - In the main screen: no TOC icon Families (no family functionality)
  - In the main screen: no big icons Search area, Bookmarks, Forward, Backward, History, Maps, Zoom in and Zoom out
  - The related functions and features also have been removed from the menus
  - To remove useless subtitles In TOC Repertories and References, these settings are default:
    - In settings "Display", "Group documents by type" is unselected
    - In settings "Sorting", at "Sort the list by": "Author" is selected
  - RadarOpus Mini allows to copy-paste, e.g. into Word:
    - One or more repertory symptoms (with/without remedies)
    - An analysis using screenshot (later on, other extended copy-paste functions will be included as well)
  - RadarOpus Mini contains WinCHIP Easy (as WinCHIP Mini has not been developed yet)
  - Free books are not visible for RadarOpus Mini users
- New - A map of Dimitriadis' Therapeutic Pocketbook Method (TRB2). A link in this map opens all three parts of the book in one click (the book will be made available with version 1.43.)
- New- The backup and restore function has been significantly optimized. Backup operations of large databases that previously took several minutes are now performed in a few seconds. The backup and restore functions are up to 30 times faster. The restore function can now restore backups made with earlier versions of RadarOpus. The file structure of the backup is totally different and should not be a concern if you happen to examine it.

## PATIENT FILE (WINCHIP): NEW IMPLEMENTATIONS

### NEW IMPLEMENTATIONS IN ALL WINCHIP VERSIONS (**EASY, LIGHT, PRO**)

- New - Send mail: in the "Search patients" window, there is a new button to send email to the patients found by the query
- Administrative window:
  - New - If a patient has more than one email address, it is now possible to send the email to all of his/her addresses. The separator character used by the user's email client can be set in the Options window
  - New - A field "Send mail" where a paper version can be printed and sent to the patient.

### NEW IMPLEMENTATIONS IN WINCHIP **LIGHT** AND **PRO**

- New - If a new value is entered in a field, it is automatically added to the field's list of data without asking the question "Would you like to add the value to the picklist?". There is an option in the program's preferences allowing you to show the question anyway

### NEW IMPLEMENTATIONS IN WINCHIP **PRO** ONLY

- New - Window "All bills" can be displayed via the menu "View - All bills". In this window you can see and print all the invoices issued to all patients. The results can be filtered by year and month if necessary
- New - Billing info
  - When printing an invoice, the invoice is automatically saved
  - In the Italian version, the feature "Marca da bollo" has been added and its value can be set in the program's preferences

## NEW BOOKS AVAILABLE FOR RADAROPUS USERS

In this intermediate version 1.42, only two new books will be available for Endeavour project users: Schroyens F., Core Synthesis 2016 and Van Woensel E., 149 Keynotes, characteristics and Peculiarities. All other books listed here will be available to all users with version 1.43.

Books followed by \*\*\* must be purchased.

➤ English

- DEGROOTE F., Remedy Interactions and Kingdoms (dgt7)\*\*\*
- DEGROOTE F., Energetic Examination (dgt8)\*\*\*

The two books above complete the set of 7 books by Degroote. More information on all books can be found on the page [www.archibel.com/filipdegroote.html](http://www.archibel.com/filipdegroote.html).

- GRIMES M., A Homeopathic Proving of Melatonin (gms6)
- HATHERLY P., The Homoeopathic Physician's Guide to Lactation (htp2)\*\*\*
- MASTER F., Homoeopathic Proving of Naja Haje, Naja Mossambica Palida and Ophiophagus Hannah (mtf47)
- SCHROYENS F., Core Synthesis 2016 (sys3)\*\*\*
- STÖTELER E., Organopathy, Organ Remedies Burnett (sly1)
- TRIVEDI N., Repertory of Infertility (tvn1)\*\*\*
- VAN WOENSEL E., 149 Keynotes, Characteristics and Peculiarities (vwe4)\*\*\*

➤ German

- ZULIAN M. Index Konzepte (cptind)\*\*\*

➤ Italian

- DOMINICI G. PITARI G. GULIA P., Etna lava - Sperimentazione omeopatica della lava del vulcano Etna (dma1.it)
- RENOUX H. Proving di Helium [Tradotto dal francese da Gabriella Rammairone] (rnh2.it)

➤ Portuguese

The following set of 9 Portuguese books will be available together as a package.

- ARAUJO C., Casos Agudos em Homeopathia (arc1.pt)\*\*\*
- ARAUJO C., Psora - Teoria e prática (arc2.pt)\*\*\*
- HAHNEMANN S., Organon da Arte de Curar [6ª Ed-5ª Ed] [Traduzido por B. Mure] (h3.pt)\*\*
- MELO LIMA C., Matéria Médica Lógica e Prática de Homeopatia (mlx2.pt)\*\*\*
- ROSENBAUM P., Medicina do Sujeito - 40 Lições de Prática Homeopática Unicista (rsp3.pt)\*\*\*
- ROSENBAUM P., Mure's Patogenesis Brasileira [Editado por Luz H. e Rosenbaum P.] (rsp4.pt)\*\*\*
- ROSENBAUM P., Miasmas, Saúde e Enfermidade Na Prática Clínica Homeopática (rsp5.pt)\*\*\*
- VAN DER ZEE H., Miasmas no Trabalho de Parto [Traduzido por Sampaia E.] (vzh2.pt)\*\*\*
- VITHOULKAS G., A Essência da Matéria Médica [Traduzido por Sampaio E.] (vh4.pt)\*\*\*

## REPERTORY AND MATERIA MEDICA: IMPROVEMENTS

- Fix - In the Polar symptom analysis, if the user takes two symptoms that have the same opposite polar symptom and the case is saved and later recalled, the program will no longer crash when clicking on the polarity symptom analysis button
- Fix - In "Tools - Options - Interface - Language of the program", the blank line has been removed. Also, translations that have not been updated have been removed. As soon as a translation is up to date, it will be added again
- Fix - In the search result, when copying one or more symptoms (Ctrl-C) and then pasting them in Word (Ctrl-V), no more strange characters appear
- Fix - When saving an analysis with Ctrl-S, the dialogue window suggests the last directory used as directory to save the current analysis
- Fix - In Spanish, to search text in the current document, Ctrl-F is the hot key (not Ctrl-B any more as this hot key is used by WinChip)
- Fix - Help for Herscu module and VES (Vithoukias Expert System) has been completed in German and Spanish
- Fix - Radarony users who updated from version 1.38 to version 1.40 now see Prof. To A. Materia Medica (toa1.zh), which was not the case before.

## PATIENT FILE (WINCHIP): IMPROVEMENTS

- Fix - Improved media files management
  - A folder for media files has been added where the user can add patient images. There are no more errors when importing data from WinCHIP 3.x.
  - Images of the patient in the bottom-left box are now always shown
  - When deleting a patient, a consultation or a sentence, the associated media files are now deleted as well
- Fix - Consultation text
  - In the "codes" picklist, the same value is no longer inserted more than once in the same sentence
  - Text does not scroll to the bottom of the page any more
  - Correct page width when the default printer layout is "Landscape"
  - Ctrl-A (Cmd-A in Mac) selects the text of all the rows of the first column
  - Ctrl-Shift-A (Cmd-Shift-A in Mac) only selects the text of the first column of the row where the cursor is located
- Fix - When saving an analysis to a patient file, the analysis is now saved with the current date, not with the consultation date
- Fix- It is no longer possible to add the same value more than once to a pick list
- Fix - In the "Search in patient file" window
  - It is now possible to search for the patient's administrative data even when no address field is included in the query

- The fields “First name” and “Last name” are not shown twice any more
- Fix - Billing info
  - The “Payment mode” field is always active now
  - The information in the field “Payed” is saved now
  - Corrected information in the “New bill” window and in the printed invoice
- Fix - In the veterinary version
  - In the administrative window, the field “Number of animals” can host 4 digits (up to 9999 animals now)
  - In the vaccinations field, the correct data is shown, no longer the human list of data
- Fix - In the prescriptions tab, it is now possible to add new values to the list of data
- Fix - Minor bugs fix, windows layout improvements, functions improvement and messages correction
