

What's new in this version

VERSION 10.5.003

- New:** Families illustrations: Jonathan Shore - Birds.
- New:** Families illustrations: Marijke Creveld – Three trees.
- New:** Families illustrations: Margriet Plouvier - Actinides.

VERSION 10.5.002

- New:** German families 3.0 in German.
- New:** German families graphs.
- New:** All other languages have access to the English families 3.0 and English families graphs .

VERSION 10.5.001 – Sept 2009

- BugFix:** Corrections in some links in the Kingdoms graphs.
- BugFix:** In german, the Luc De Schepper materia medica was opened in english.
- New:** Search for a family in the graphs.
- New:** Anne Vervarcke information document (linked in her graph).

VERSION 10.5 – Aug 2009

• Families Repertory

- Will Taylor has taken the families repertory to another level, scientifically reliable and fully updated to APG II.
- Amazing functionality; allows rapid access to any family via elegant new graphical presentations.

• Rajan Sankaran ¹

- Families, Themes and Miasms. A fantastic graphical overview with access to all his latest Shema information.
- Highlight remedies or limit your analysis to just his families.

• Luc De Schepper's Newsletter and Module ¹

- Learn from a great classical homeopathic master. Access video cases and lecture information. Much more than a module, it's a real learning experience.

• Jan Scholten Periodic Table ¹

- Graphical access to Jan's complete periodic table.
- Also available: an EH book package with all Jan's books.

• Jeremy Sherr Repertory of Mental Qualities ¹

- Ever wondered whether the most precise rubric for your case is "fear of poverty", "avarice" , "delusion poor" or "extravagant"?

- Just choose the “money” rubric from Jeremy Sherr’s new repertory of the main mental qualities and you can be confident that the right remedy will be there.

- **Many new features and modules**

- Improved user control over the quality of additions.
- Simple removal of unwanted remedies.
- New Remedy Synonyms list.
- Improved Multimedia functions.
- A new tool for teachers to repertorise their own provings.
- Quickly make additions from seminar notes or cured cases in a new personal EH database.

1 Indicates an optional module, not included in the standard update Radar 10.5.

radar Version 10.5

Repertory Program

With EH 2.5 and Synthesis Treasure Edition (TE)-2009

Time to update!

Radar 10.5 has many amazing new features and optional modules.

• Families Repertory

- Will Taylor has taken the families repertory to another level, scientifically reliable and fully updated to APG II.
- Amazing functionality; allows rapid access to any family via elegant new graphical presentations.

• Rajan Sankaran¹

- Families, Themes and Miasms. A fantastic graphical overview with access to all his latest Shema information. Highlight remedies or limit your analysis to just his families.

• Luc De Schepper's Newsletter and Module¹

- Learn from a great classical homeopathic master. Access video cases and lecture information. Much more than a module, it's a real learning experience.

• Jan Scholten Periodic Table¹

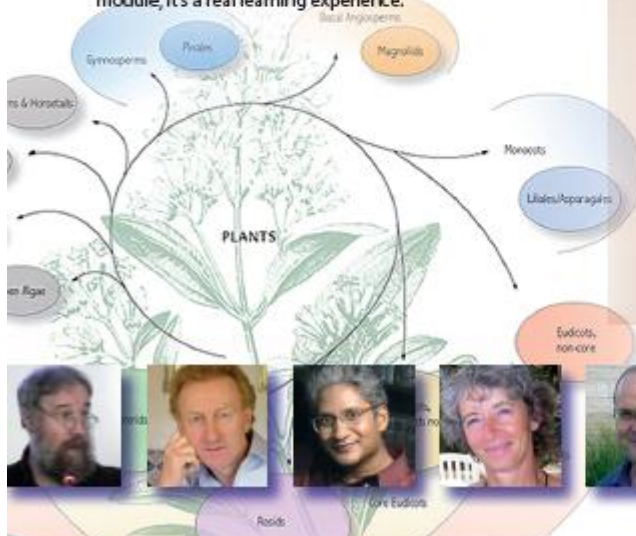

- Graphical access to Jan's complete periodic table.
- Also available: an EH book package with all Jan's books.

• Jeremy Sherr Repertory of Mental Qualities¹

- Ever wondered whether the most precise rubric for your case is "fear of poverty", "avarice", "delusion poor" or "extravagant"?
- Just choose the "money" rubric from Jeremy Sherr's new repertory of the main mental qualities and you can be confident that the right remedy will be there.

• Many new features and modules

- Improved user control over the quality of additions.
- Simple removal of unwanted remedies.
- New Remedy Synonyms list.
- Improved Multimedia functions.
- A new tool for teachers to repertorise their own provings.
- Quickly make additions from seminar notes or cured cases in a new personal EH database.

“A beginner, a professional, or a homeopathic scholar will never be disappointed. I recommend this program to every practitioner who wants to have the best results in their practice.” - Luc De Schepper MD

“A wonderful working and learning tool. Race around the repertory and access really useful cross-references.” - Misha Norland

(1) Indicates an optional module, not included in the standard update Radar 10.5.

Still not convinced?

• Synthesis TE-2009¹

- Access more information than ever before.
- Remedies from subrubrics have been copied to the next super rubric throughout the whole repertory (every symptom has been controlled manually).
- New clinical rubrics have been created and additional conceptual rubrics enable easier access to the information.

- Contemporary provings added.
- Ongoing internet access to downloads so you are never out of date.
- Includes another set of additions from André Saine - now current October 2008.

Quality remains our most important priority.

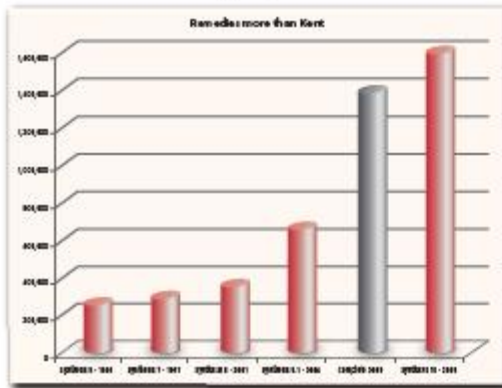

Reliability and Quality of Synthesis

With Synthesis you always have full control.

- You determine the information you see, and the information YOU have confidence in.
- All additions are classified (from classical sources, Hahnemannian provings - meditation and dream provings or theoretical speculative information).
- Keep control with our "views", determine how different levels of information will affect your case analysis.

SYNTHESIS Treasure Edition (TE) - 2009

With Synthesis you have the quality and quantity to help your patients

Synthesis TE-2009¹

With One Year Free Live Update Downloads !!!

Yes you can eliminate uncertified remedies and authors !!

◀ "A major breakthrough in repertorial software." - Farokh Master.

◀ "I would not want to be without RADAR in my practice. An amazing tool!" - Gabriela Rieberer.

◀ "Indispensable as a 'symptom cruncher' - a versatile homeopathic assistant." - Brian Kaplan.

◀ "Encyclopedia Homeopathica is the finest, most advanced, homeopathic research and analysis program extant on Mother Earth." - Mitch Fleisher.

◀ "Within a day of being introduced to Encyclopedia Homeopathica, I was reduced to the words of my 13 year old son - totally awesome." - Will Taylor.

◀ "It has always been my purpose to contribute as much as possible to the art and science of homeopathy. With all that I have accomplished, the Vithoulkas Expert System represents the greatest contribution that I have made to homeopathy." - George Vithoulkas.

Repertory Program

archibel
Homeopathic Software

www.archibel.com - Info@archibel.com

(1) Indicates an optional module, not included in the standard update Radar 10.5.

VERSION 10.0.0034 – 20 July 2009

New: German easy programs integrated in production.

VERSION 10.0.0033 – 5 March 2009

New: Access to Synthesis Foreword from the Help menu (in the Menu go to: Help - About Synthesis). (access to one Synthesis foreword or to different languages? - local or to website)

New: New multimedia possibilities for the remedies: You can link an unlimited number of MultiMedia objects to remedies; in addition to linking a picture, sound and video, you now can add other types of files as well (e.g. a PDF file); the columns can be sorted ascending and descending by clicking on the header row; a MultiMedia object can be easily added by selecting a remedy, then by clicking on the plus icon above the column indicating the type of MultiMedia you want to add (in the Menu go to: View- Multimedia List for remedies)

New: The list of remedy synonyms is available from within Radar (in the Menu go to: View – Synonyms for remedies)

New: The list of repertories can be filtered in the open repertory window, by typing in the rectangle. If you type "sensations" you will find all repertories with the word "sensations" in the title (Roberts and Ward).

BugFix: For software protected versions (Crypkey), Radar does not install the hasp drivers.

New: Saving or exporting cases has become more flexible. When a case is saved or exported, the program remembers and opens the last folder where you saved or exported a case. This is the default option (you can set this option by editing the file Radar.ini: in the "System section" you should have (or add) the line: AutomaticLastCaseCall=1).

Alternately, you can prefer that the program always opens the folder "../radar/cases" when you want to save or export a case (edit the file Radar.ini: in the "System section" you should have (or add) the line: AutomaticLastCaseCall=0).

BugFix: When exporting a case to a cas file, if a warning were displayed (for example: all symptoms from the same group must have the same intensity), the exported case file was empty (fixed)

Installation

New: The installation of the LiveUpdate checks now if there is enough disk space.

EH 2.2.7

New: Runs on Eeepc.

New: Export analysis to Radar clipboard (ehtoradar + 083) is now standard in all productions.

VERSION 10.0.0032 – 3 Nov 2008

New: The Uncertified information is now shown by default.

BugFix: Some crashes when importing from winchip.

Jeremy Sherr Wizard

New: The german manual is now displayed from the Help button.

BugFix: The number of active rubrics is now correctly displayed in the analysis.

New Remedies

173 new remedies have been added to the catalogue:

acantha-pl.	acanthaster planci	bor.	borium
acer-ps.	acer pseudoplatanus	borr-bd.	borrelia burgdorferi
aceto-xl.	acetobacter xylinus	botr-cn.	botrytis cinerea
acro-xyz.	acropora unknown species	bran-cn-o.	branta canadensis ovum
acti-met.	actinium metallicum	bro-rc.	bromus racemosus
actin-ir.	actinomyces israelii	calc-o-gl.	calcareo ovi gallinae
adal-bp.	adalia bipunctata	calyp-an.	calypte anna
adeps-ov.	adeps ovis	camp-jj.	campylobacter jejuni
agar-bp.	agaricus bisporus	carc-cupr.	carcinosinum cum cuprum
agar-bz.	agaricus blazei	cartl-sl-xyz.	cartilago squaloidei unknown species
ajel-dm.	ajellomyces dermatitidis	ccv-xyz.	common cold virus
allig-sin-seb.	alligator sinensis sebum	cerv-elaph-m.	cervus elaphus maral
alter-at.	alternaria alternata	coccid-im.	coccidioides immitis
amary-be.	amaryllis belladonna	copr-at.	coprinopsis atramentaria
ana-fa.	anabaena flos-aquae	cora-h-s.	corralus hortulanus sebum
ans-as.	anser anser	cort-or.	cortinarius orellanus
anten-dc.	antennaria dioica	corv-cr-cr.	corvus corone corone
anthop-xa.	anthopleura xanthogrammica	corv-sp.	corvus splendens
aquil-ht.	aguila hastata	corv-sp-o.	corvus splendens ovum
arauc-ar.	araucaria araucana	crin-is.	crinia insignifera
ardea-cn.	ardea cinerea	crot-ax.	crotalus atrox
arg-sula.	argentum sulphuratum	crot-cr-cr.	crotalus cerastes cerastes
armi-ml.	armillaria mellea	culx-per.	culex pervigilans
arth-ar.	arthrinium arundinis	cypri-carp.	cyprinus carpio
asperg-cd.	aspergillus candidus	daphn-pl.	daphnia pulex
astat-s.	astatinum sulphuratum	dendr-ang.	dendroaspis angusticeps
aste-pl-a-xyz.	asteroid Paleozoic Australia unknown species	dendr-vir.	dendroaspis viridis
aureo-pl.	aureobasidium pullulans	dens-eleph.	dens elephantum
auri-pl.	auricularia polytricha	diom-ml.	diomedea melanophris
aur-sul.	aurum sulphuricum	dogt-sp.	dogtooth spar
bamb-vg.	bambusa vulgaris	erythr-ly.	erythrina lysistemon
basl-bs.	basiliscus basiliscus	eur-met.	europium metallicum
basl-vt.	basiliscus vittatus	fel-ct-pl.	felis catus pilus
bism-p.	bismuthum phosphoricum	fel-vp.	fel vulpis
bomb-mr.	bombyx mori	forf-au.	forficula auricularia
booph-dt.	boophone disticha	fus-gm.	fusarium graminearum

fus-sr.	fusarium sporotrichioides	nico-tb-f.	nicotiana tabacum fumus
gado-met.	gadolinium metallicum	nnect-dt.	neonectria ditissima
gad-xyz.	gadus unknown species	ocordyc-sn.	ophiocordyceps sinensis
gallus-d-pn.	gallus gallus domesticus penna	ol-pin-xyz.	oleum pinus unknown species
gano-lc.	ganoderma lucidum	omph-il.	omphalotus illudens
gav-sl.	gavia stellata	oplo-hr.	oplopanax horridus
ger-ps.	geranium pusillum	oryc-cn-s.	oryctolagus cuniculus sanguis
glom-mg.	glomeris marginata	panth-gt.	pantherophis guttatus
gnaph-d.	gnaphalium dioica (old name; new = anten-dc.)	panth-obs.	pantherophis obsoletus
granit-mai.	granitum maissau	paracoc-bs.	paracoccioides brasiliensis
gra-sp-ch.	graphium sarpedon choredon	parap-cv.	paraponera clavata
gravit.	gravitas	pax-iv.	paxillus involutus
grif-fd.	grifola frondosa	penic-gf.	penicillium griseofulvum
gym-sp.	gymnopilus spectabilis	penic-rq.	penicillium roqueforti
gyr-ec.	gyromitra esculenta	perla-myt.	perla mytilii trossulus
hadrian-w.	Hadrian's wall	petr-cr-no.	petroleum crudum norvegicum
haemo-sg.	haemopsis sanguisuga	pipt-bt.	piptoporus betulinus
hanss-uv.	hansiaspora uvarum	plb-sul.	plumbum sulphuricum
hist-cs.	histoplasma capsulatum	pleu-ot.	pleurotus ostreatus
indigo	indigo color	pop-canec.	populus canescens
inon-ob.	inonotus obliquus	pyrit-au.	pyrites aureus
lac-alc.	lac alcesum	sacchps-er.	saccharopolyspora erythraea
lacer-mr.	lacerta muralis	sacmy-pt.	saccharomyces pastorianus
lach-l-xyz.	lachesis lanceolatus unknown species	sals-tr.	salsola tragus
lac-hyae.	lac hyaeninum	scl-d-ct.	scleroderma citrinum
lac-lep-eu.	lac lepinum europaeum	semen-h.	semen humanum
lac-oryc.	lac oryctolagum cuniculum	sia-cr.	sialia currucoides
lac-pan-p.	lac pantherinum pardum	soph-mph.	sophora microphylla
lac-phas-c.	lac phascolarctosinum cinereum	stachy-ct.	stachybotrys chartarum
lac-sui-sc.	lac suinum scrofinum	streptom-amb.	streptomyces ambofaciens
lent-ed.	lentinula edodes	streptom-aur.	streptomyces aureofaciens
lep-dv-xyz.	lepidoptera Divya unknown species	streptom-cp.	streptomyces caespitosus
leucas-cap.	leucas capensis	streptom-fd.	streptomyces fradiae
lumen-art.	lumen artificialis	streptom-gar.	streptomyces garyphalus
macl-pom.	maclura pomifera	streptom-ns.	streptomyces noursei
microm-pp.	micromonospora purpurea	streptom-nsd.	streptomyces nosodus
morch-ec.	morchella esculenta	streptom-rm.	streptomyces rimosus
mseq-gl.	metasequoia glyptostroboides	streptom-vz.	streptomyces venezuelae
myot-mt.	myotis myotis	sulis.	sulis aqua
naja-mo.	naja mossambica	suther-fr.	sutherlandia frutescens
neoty-ll.	neotyphodium lolii	tab-fum.	tabaci fumus (old name; new = nico-tb-f.)
nico-r.	nicotiana rustica	tant-i.	tantalum iodatum

telop-sp.	telopea speciosissima	trichl-ps	tricholoma pessundatum
toxop-pl.	toxopneustes pileolus	trichl-sj.	tricholoma sejunctum
tram-vs.	trametes versicolor	trichl-sp.	tricholoma sulphureum
tremf-fc.	tremella fuciformis	trichoph-ts.	trichophyton tonsurans
trep-pl-pt.	treponema pallidum pertenu	tuber-ml.	tuber melanosporum
trichm-ac.	tricholomicum acidum	ursus-ar-h-s.	ursus arctos horribilis sanguis
trichl-mc.	tricholoma muscarium	vibr-chl.	vibrio cholerae
trichl-mt.	tricholoma matsutake	ziza-pl.	zizania palustris
trichl-pd.	tricholoma pardinum		

New Feature

New: In Options, possibility to specify the information in research. It's a list of authors or remedies you do not want to see in the repertory and in your analysis.

Luc DeSchepper Wizard

New: 8 introduction videos available from the Multimedia button in the wizard.

New: Clipboard names have been changed (including the rubrics intensity).

New: Page Up and Page down go to the previous or the next step.

New: The core delusions are now displayed in the same order as the 5 first remedies of the analysis.

New: In F8 windows under the Luc's menu, option to search for the Code Delusions out of the wizard.

New: The Videos are now protected with a password. A message from Luc is displayed before to show the video.

Small changes

New: The Live Update propose to download only the freenotes in the languages selected in the Freenotes filter.

New: If no repertory is specified when loading Radar, the last one is automatically open.

New: Symptoms markers are now exported in the cas files.

New: In search function (F4) in a concept repertory, the words and branches are now available.

BugFix: Radar was crashing when showing pictures of remedies if more than 10 pictures were present.

New: In analysis (F8), Ctrl+Enter has been activated to group/combine rubrics.

New: New option in the clipboard contextual menu to clear clipboards + reset the names to their default name

New: In German, when right click on a remedy in the repertory to search in EH, the text is now filtered.

Import from EH

New: Import remedy from EH is available in the contextual menu in the repertory (also with Shift+F7).

New: Import remedy from EH is available in the contextual menu of the clipboards – to import the remedy in all symptoms from the clipboards.

New: This function is also available with the right click on a rubric in the repertory.

EH 2.2.5

New: Some menus and messages have been modified.

New: Right mouse click on material medica symptoms to export the rubric to Radar (also with Shift+F7).

New: Export to Radar with the author abbreviation from the personal database.

New: Improved formatting in the personal MM database.

New: When the contextual menu is displayed in the document (right click), if nothing is selected in the document, the cursor is first placed where the right click has been done (to select this record).

BugFix: When calling the Luc's material medica from Radar (in EH) sometimes, the database was not open correctly (one time on two).

Jeremy Sherr Wizard

New: If coming from the Case Taker, the last open repertory is automatically open.

BugFix: After a transfer from the case taker, when doing Alt-Tab to go in EH, EH was crashing sometimes.

BugFix: Radar imports now correctly the unload characters in german (Ü, Ö etc...).

New: When limiting analysis to a meta rubric, the repertory of Mental Qualities is automatically open.

LiveUPdate

New: The connection problems to the liveupdates are solved (now the passive mode is used).

Boenninghausen

BugFix: When exporting then importing a Boenninghausen case, the polarity calculation was wrong.

New: In analysis, the polarities are displayed in another color.

New: Concordances search (from analysis) is now available when the free mode is activated.

VERSION 10.0.0030 – 31 July 2008

BugFix: The management of 'Uncertified information' has been delayed for a new version because it was causing problems when taking symptoms in the clipboards.

New: In German, when right click on a remedy in the repertory to search in EH, the text is now filtered.

VERSION 10.0.0029 – 25 July 2008

New Feature

New: In Options, possibility to specify the information in research. It's a list of authors or remedies you do not want to see in the repertory and in your analysis.

Luc DeSchepper Wizard

New: 8 introduction videos available from the Multimedia button in the wizard.

New: Clipboard names have been changed (including the rubrics intensity).

New: Page Up and Page down go to the previous or the next step.

New: The core delusions are now displayed in the same order as the 5 first remedies of the analysis.

New: In F8 windows under the Luc's menu, option to search for the Code Delusions out of the wizard.

New: The Videos are now protected with a password. A message from Luc is displayed before to show the video.

Small changes

New: The Live Update propose to download only the freenotes in the languages selected in the Freenotes filter.

New: If no repertory is specified when loading Radar, the last one is automatically open.

New: Symptoms markers are now exported in the cas files.

New: In search function (F4) in a concept repertory, the words and branches are now available.

BugFix: Radar was crashing when showing pictures of remedies if more than 10 pictures were present.

New: In analysis (F8), Ctrl+Enter has been activated to group/combine rubrics.

New: New option in the clipboard contextual menu to clear clipboards + reset the names to their default name

Import from EH

New: Import remedy from EH is available in the contextual menu in the repertory (also with Shift+F7).

New: Import remedy from EH is available in the contextual menu of the clipboards – to import the remedy in all symptoms from the clipboards.

New: This function is also available with the right click on a rubric in the repertory.

EH 2.2.5

New: Some menus and messages have been modified.

New: Right mouse click on material medica symptoms to export the rubric to Radar (also with Shift+F7).

New: Export to Radar with the author abbreviation from the personal database.

New: Improved formatting in the personal MM database.

New: When the contextual menu is displayed in the document (right click), if nothing is selected in the document, the cursor is first placed where the right click has been done (to select this record).

BugFix: When calling the Luc's material medica from Radar (in EH) sometimes, the database was not open correctly (one time on two).

Jeremy Sherr Wizard

New: If coming from the Case Taker, the last open repertory is automatically open.

BugFix: After a transfer from the case taker, when doing Alt-Tab to go in EH, EH was crashing sometimes.

BugFix: Radar imports now correctly the unload characters in german (Ü, Ö etc...).

New: When limiting analysis to a meta rubric, the repertory of Mental Qualities is automatically open.

LiveUpdate

New: The connection problems to the liveupdates are solved (now the passive mode is used).

Boenninghausen

BugFix: When exporting then importing a Boenninghausen case, the polarity calculation was wrong.

New: In analysis, the polarities are displayed in another color.

New: Concordances search (from analysis) is now available when the free mode is activated.

VERSION 10.0.0028 – 8 May 2008

Small changes

New: After an update, the personal authors and remedies are re-injected into the new official catalogue.

BugFix: The Russian Keynotes were not installed in the correct folder

New: In the Dutch version, the families were not correctly selected in EH

VERSION 10.0.0027 – 18 Apr 2008

Luc DeSchepper Wizard

New: Updated manual for Luc De Schepper module (in English).

New: Manual for Luc De Schepper module in German

New: New videos

EH

New: When the Materia Medica of Luc was open via Radar, the next time EH opened again this database instead of the normal one.

Small changes

BugFix: Fixed some rare crashes when exporting cases to single files.

BugFix: Radar was crashing when importing an empty case file.

New: New remedy picture for remedy 'rescue' (Bach Flower).

VERSION 10.0.0026 – 25 Mar 2008

Luc DeSchepper Wizard

New: Updated manual for Luc De Schepper module (in English).

BugFix: The path for multimedia files in the Luc De Schepper module have been updated to the new FTP server.

Small changes

New: In the backup selection, when clicking on the "Browse" button, the user can now select a drive to make his backup on an external hard disk or a memory stick.

New: The default backup folder is now based on the date in reverse order (easier for sorting).

New: When exporting a case, all clipboards are exported.

New: When exporting a catalogue of cases, if the case name contains / or \, Radar converts it to _ to avoid errors in the file names.

VERSION 10.0.0025 – 11 Mar 2008

Small changes

BugFix: Sometimes when exporting analysis to RTF files in another folder than the default, the generated file contained “Message 9000/1” instead of the correct message.

BugFix: Sometimes when exporting a case, the title of the file selection dialog was “Message xxxx”.

New: When exporting cases catalog to single files, the date of the case is added to the filename in the format “yyyymmdd”.

New: New option (in general options) to use single case files instead of the database.

VERSION 10.0.0024 – 28 Feb 2008

Boeninghausen Module

New: Now when starting the BHM in FreeWay (option Wizard off in BHM options), when taking rubrics, they go automatically in the associated clipboard and the polarity is taken in his clipboard automatically.

This is available from the Repertory, Find, and search result windows with the '+1' function (as before)

In this case (FreeWay), the analysis shows also the polarities scores.

Small changes

BugFix: Since 10.0.0023, after a case importation, when trying to save a case, the full path of the imported case was displayed in the case name field.

VERSION 10.0.0023 – 22 Feb 2008

Small changes

New: New function to export all the cases from the current catalogue to single files (cas files). This function is found under the menu File - Export

New: The import/export function for cases can now manage file names containing special characters.

New: The import/export function for cases keeps the last path for import/export.

New: When installing this version, the LiveUpdate option is set to “every week”.

BugFix: When exporting the search results, the accentuated characters were not correct in some languages.

BugFix: Messages fixed in german (in F8 to move symptoms).

Russian version

New: Roots and branches database has been added.

New: When searching a word in lower case, the same word in upper case is also found.

Japanese version

BugFix: The icons of the chapters have been corrected.

BugFix: The quick take function '+' in the find symptoms and search results window does not crash anymore

BugFix: In the find chapter window, when typing a wrong name, the cursor stay at the end of the text box

VERSION 10.0.0022 – 07 Feb 2008

Russian version

BugFix: In the find symptoms, when typing in lower case, it finds now also rubrics in upper case.

BugFix: The quick take function '+' in the find symptoms and search results window does not crash anymore

BugFix: When searching a word in lower case with '?', it finds also the upper case symptoms (see CTPAX)

BugFix: In the find chapter window, when typing a wrong name, the cursor stay at the end of the text box

BugFix: When sending the analysis to EH, it sends the english text for russian synthesis

Small changes

New: Accept "Views" in the Essential Synthesis English and German.

BugFix: In F8, when switching from Above/Below presentation to Side by Side, the list of remedies was not always correctly displayed.

New: The remedies with XXX reference are now displayed by default in strikethrough and gray color..

BugFix: Changing the fonts and color for XXX remedies was not saved correctly.

BugFix: For first versions of Radar 10, the help file was not accessible under Vista.

VERSION 10.0.0021 – 21 Dec 2007

Hasp Drivers

New: If Radar does not find the connector (maybe because the Hasp drivers are not correctly installed), it installs automatically the drivers.

General changes

New: The remedies with an author 'XXX' are displayed in a specific format. This format can be specified in the Fonts and colors options. By default it is a strikethrough font.

Sympom clipboards

BugFix: When taking symptoms in more than one clipboard via the F6 window, sometimes it crashed.

BugFix: When taking symptoms with remedies of subrubrics in more than one clipboard, it crashed.

BugFix: When deleting one clipboard or all clipboards, sometimes, it crashed.

Analysis (F8)

New: When restricting to the Jeremy's Meta-rubrics, the Jeremy's repertory is automatically open (instead of displaying an error message).

New: 3 new icons can be displayed: Sankaran, Luc De Schepper and Jeremy. These icons are only displayed if the user has access to the specific module. Each icon can be hidden / displayed via the menu "Display – Show icons" (in the analysis window – F8).

LiveUpdate

New: The Live Update proposes the freenotes only for the languages selected in the Freenotes language filter.

Luc DeSchepper Wizard

New: When selecting a concept from the Wizard, instead of taking all symptoms related to the concepts, Radar shows the list of rubrics for the concept and the user can select the list he wants to take with '+1' (or another intensity)

New: The wizard window is now larger to display longer rubrics **(also for other wizards)**

New: If some rubrics are too long to be displayed, an horizontal scroll bar is displayed **(also for other wizards)**

New: The function keys (F2 – F3 – F4) are available from the Wizard **(also for other wizards)**

New: New button to save the case from within the wizard **(also for other wizards)**

New: When the user search for a rubric to take it (via the find button), if this rubric is a referring rubric without remedy, the program asks if the user wants to take the master synonym instead. **(also for other wizards)**

New: The Luc's picture has been replaced by an Iceberg with the level under the water starting from dark to light with the steps

New: The help button gives now access to a general help and specific help by step

New: The 3 search button are always present and the order is now: Find – Search - Concepts

New: The search and find buttons are not connected to defined parts of the repertories

New: When the user wants to take more rubrics than the maximum number for a step, a warning message is displayed

New: New button to open the Luc's materia Medica

New: When entering the Core Delusions step, the wizard asks if the user wants to search automatically for the code delusions and make the analysis (only if no core delusion is already selected)

New: The button to search for the core delusions launch the analysis automatically

New: The top 5 core delusions are searched (the step name has been changed)
